

2Simple have once again held their exciting, annual Festive Card Competition where children around the world use the award-winning platform, Purple Mash, to submit a festive card summarising what the festive period means to them. Children could enter one of three categories: Under 5s, under 8s and under 12s. The competition was originally launched in 2014 and has grown each year at 2Simple. This year, there were over 10,000 entries received from schools worldwide.

2Simple has been making powerful and creative educational software for learners and schools since 1999. They are committed to providing creative, inclusive and inspiring software to encourage children to love learning and prepare them for later life. 2Simple supports teaching and learning with a variety of resources and today their software is used by learners in over 11,000 schools, in more than 74 countries.

Purple Mash is 2Simple's educational, creative, and inspiring tool that engages pupils in over 7,000 schools worldwide. It includes a collection of essential child friendly, ergonomically designed tools, games and activities. These resources are for children and teachers across core subjects and as well as other curriculum areas. This includes the popular 2Paint a Picture tool which children used to create and submit their designs for the 2024 Festive Card Competition.

We are delighted to announce that **Kavita** from **Birches First School** has been chosen as a winner!

Each winner won printed copies of their card, and their card turned into an e-card on the Purple Mash website. They also received a £20 Amazon voucher, and a giftbag full of 2Simple merchandise, including the highly sought-after Cody plushie!
